

biz-find is Thailand's Number one free 'user-added' online Business directory and lead sourcing website for Thailand, and has been online since January 2013. In December 2014 we reached 11,000+ visits of which over half were new visits to the site

Our first directory was biz-find.co.uk which launched in January 2012 and at December 2014 reached 39,000 visitors over which half were new visitors.

Since 2012 we have launched a further 6 more sites for the ASEAN market and the USA.

Biz-find's marketing is purely through blogging and the use of social media. The holding company of Biz-find; Netmedia is Thailand's leading social media marketing training company according to Google. Biz-find Thailand is also page one on Google for; 'Free business directory Thailand'.

Companies in Thailand can register on Biz-find free and we market their business on social media for free, we are unique in the market place with our monetization method of getting leads from our free listed members in return for upgrades and banners. We then sell our member's wants as pay for leads.

One of the best reasons to register free on Biz-find now is the fact that we are in seed investment stage and we will be investing heavily on more paid marketing in 2015, on top of our organic marketing we have been doing for 3 years already, this will mean more traffic for our listed members.

The owners of biz-find have over 25 years in direct marketing to public and private business sectors and have ten years online marketing experience we are Fellows of the UK Institute of Sales and Marketing management ISMM.

We are also UK government recognised Small business mentors through the OICC and SFEDI

Your training on social media was very good as well, and the blogging site that was set up in a few hours only is already attracting a growing No of visitors. Thanks once again.

Compass Hospitality

Thank you Alan you were patient and considerate and my staff gained so much even though English was not their first language, and best of all I could not believe how cost effective your training was.

—Nakrit Sawatteanan
